PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience building and deploying scalable web applications using Java, Spring Boot, Node.js, React, Next.js, MySQL, and AWS. Experienced in designing secure REST APIs, implementing authentication and authorisation systems, optimising application performance, and managing cloud infrastructure. Delivered production-grade platforms from architecture and development to deployment and maintenance in agile environments.

WORK EXPERIENCE

APEX STRUCTURE PVT. LTD. **Dec 2025 – Present**
Software Engineer Indore, Madhya Pradesh, India

- Built the company's full web platform (main website, backend, and admin CMS) using Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, and MySQL, and handled it from design through deployment and maintenance across 150+ pages.
- Set up and managed AWS infrastructure (EC2, RDS, S3, CloudFront, SES, Route 53, CloudWatch) and built CI/CD pipelines that cut deployment time by about 40%, to around 15 minutes per release.
- Developed and secured 180+ REST APIs with JWT authentication, CSRF protection, and role-based access control (RBAC) for several super admins and HR users and built the CMS dashboard in React.js with TanStack Query to manage the entire data in realtime.

JAITRRRM PRIVATE LIMITED **May 2025 – Nov 2025**
Software Engineer & Team Leader Delhi, India

- Led a team of 8+ engineers to deliver Alpha-Way v1, a B2B SaaS platform, on time, managing sprint planning, task assignment, and code reviews in an Agile environment.
- Designed and developed a layered Java Spring Boot backend and built 50+ REST APIs for the client dashboard and admin modules, documented in Postman and managed with Git and GitHub.
- Implemented JWT-based authentication and role-based access control (RBAC) for admin and operator users, and worked with the Next.js and TypeScript frontend team to define API contracts for smooth integration.
